

Amal Johnson

Software Engineer — Angular Developer

Thrissur, Kerala — +91 8289991926 — 1mailtoamal@gmail.com
GitHub — LinkedIn

Professional Summary

Innovative and detail-oriented Front End Developer with hands-on enterprise experience designing, developing, and deploying high-performance, responsive web applications using Angular, React, and TypeScript. Expert at transforming complex UI/UX designs into seamless, human-centered digital experiences while adhering to modern codebase architectures and strict code quality benchmarks. Adept at leveraging version control workflows, collaborating in Agile cross-functional environments, and implementing modular frontend solutions that drive organizational and business value.

Skills

Programming Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, Modern Web Standards
Frontend Frameworks	Angular (Core Expert), React.js, RxJS, Component-Driven Architecture
UI/UX & Design	Human-Computer Interaction, UI/UX Design Principles, Responsive Layouts
Version Control & Tools	Git, GitHub, Git Workflows, Postman API Testing, Nginx Deployment
Core Methodologies	Agile/Scrum, Code Reviews, Performance Tuning, AI-Assisted Development

Technical Experience

Eduvy Technology Pvt Ltd <i>Software Developer (Frontend Focus)</i>	Remote / Office Mar 2025 – Present
---	--

- **Frontend Application Development:** Architect and refine modern, scalable frontend architectures for the flagship College Panel and Super Admin Panel, integrating state-of-the-art UI/UX patterns.
- **High-Impact Platform Migration:** Spearheaded the successful engineering and delivery of an extensive web application alternative to the existing mobile app utilizing Angular, expanding active user accessibility and cross-platform performance metrics.
- **Scalable Module Engineering:** Conceptualized and developed multi-step enterprise workflows, including a dynamic student registration tracking system, ensuring high codebase maintainability and clean abstractions.
- **Cross-Functional Collaboration:** Partner with backend engineers, designers, and QA stakeholders within Agile sprints to synthesize project criteria into secure, high-quality code deliverables.
- **Code Quality & Reviews:** Active code reviewer driving peer development best practices, structural refactoring, and strict linting compliance to maintain premium codebase health.
- **Reusable UI Components:** Designed and engineered an internal library of robust, reusable UI design tokens and shared components, accelerating baseline product feature delivery across panels.
- **Secure System Integrations:** Enforced secure communications via modern JWT paradigms and custom Angular HTTP Interceptors for streamlined API state resolution.

Featured Projects

- **Eduvy ERP System Web Component:** Designed robust frontend systems optimized for institutional data management ecosystems, building responsive dashboards containing granular role-based authentication rules. (Live Link)
- **Samaya E-commerce Platform:** Engineered a full-stack digital commerce experience using an Angular frontend and Node.js/MongoDB back-end ecosystem; prioritized human-centered visual hierarchies, transactional security, and Nginx reverse-proxy hosting. (GitHub)
- **Enterprise Admin Dashboard:** Built an interactive user management module centered on real-time data visualization frameworks, token refresh security routines, and modern UI paradigms. (GitHub)

Education & Training

Brototype

Kochi, India

*MERN Stack Software Engineering Program (Educational Practicum)***Jan 2024 – Feb 2025**

- Immersed in an intensive project-driven development tract concentrating on JavaScript full-stack software architectures, automated testing, and strict Git version control methodologies.

Bharathiar University

Coimbatore, India

*Bachelor of Computer Applications (BCA)***2020 – 2023**
